

## Self-Adhesive Waterproofing Tapes

**BTM Bitusef Star** - Self adhesive waterproofing tape consist of elastomeric modified bitumen and laminated with polyester laminated aluminium foil.

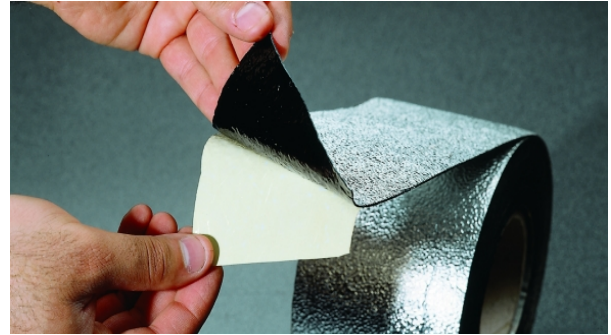

### Places of Use

It has adhesion on a variety of surfaces such as:

- wood
- metal
- glass
- plastik
- plaster
- concrete.
- It is used in a variety of repair and waterproofing works.

### Surface Preparation

Surface to which it shall be applied must be clean and dry. All loose parts, form-detaching greases, residues, paint, rust and other poorly adhered materials must be cleaned off the surface. Metallic, plastic, etc. surfaces must be cleaned by using a proper solvent. BITUSOL or BITUMER undercoat must be applied to such rough surfaces as concrete, plaster, chipboard, etc. and left until the surface dries out.

### Mode of Application

Surface to which it shall be applied must be clean and dry. All loose parts, form-detaching greases, residues, paint, rust and other poorly adhered materials must be cleaned off the surface. Metallic, plastic, etc. surfaces must be cleaned by using a proper solvent. BITUSOL or BITUMER undercoat must be applied to such rough surfaces as concrete, plaster, chipboard, etc. and left until the surface dries out.

### Packaging

Bitusef STAR is packed in rolls of 10-15-20-30-60 cm wide and 10 m long.

### Storage Conditions

One year from the production date in case it is stored in its sealed and undamaged package in dry ambient conditions at a temperature from +5°C to +25°C away from direct sunlight.

### Advantages

- Is very easy to apply.
- Is self-adhesive.
- Eligible for contact with bitumen.
- Is resistant to UV rays.

- 
- Excellently adheres to a great many surfaces.
  - May be applied at lower temperatures.
  - Is not affected by weather conditions.
  - Use of coated aluminium foil makes colour choice possible.
  - Is economical.
